

*\*For shifts with protocols, the expectation is that protocols are completed during the shift (ideally at the start of the shift prior to CT/MR reporting).*

*\*Radiologists are responsible to assign any cases to their personal worklist which are not reported by the end of the shift.*

*\*For shifts with protocols, the expectation is that protocols are completed during the shift (ideally at the start of the shift prior to CT/MR reporting).*

*\*Radiologists are responsible to assign any cases to their personal worklist which are not reported by the end of the shift.*

*\*For shifts with protocols, the expectation is that protocols are completed during the shift (ideally at the start of the shift prior to CT/MR reporting).*

*\*Radiologists are responsible to assign any cases to their personal worklist which are not reported by the end of the shift.*
